

VIII. I Claim:

5 1. A method for generating an ornamental design on a courier shipping label at a non-courier printer in connection with printing the label for a particular shipment specified on the label, the method including the steps of:

assigning shipping information signals corresponding to a shipping label for a particular shipment with a digital electrical computer shipping apparatus;

transmitting the shipping information signals corresponding to the shipping label for the particular shipment to a non-courier printer device;

10 combining the shipping information signals corresponding to the shipping label for the particular shipment with signals corresponding to an ornamental design; and

printing the shipping label for the particular shipment at the non-courier printer device including an ornamental design.

15 2. The method of claim 1, wherein the ornamental design includes a heart.

3. The method of claim 1, wherein the ornamental design includes a wreath.

20 4. The method of claim 1, wherein the ornamental design is printed in color.

25 5. The method of claim 1, wherein the ornamental design is a printing of bit map, said bit map not including a logo, shipment, or courier information.

6. The method of claim 1, wherein the ornamental design is a first

design and said first design includes a second design.

7. The method of claim 1, further including the step of controlling addition of the design to the shipping label at an ordering system computer.

8. The method of claim 1, further including the step of controlling addition of the design to the shipping label at an ordering center system computer.

9. The method of claim 1, further including the step of controlling addition of the design to the shipping label at a financial institution system computer.

10. The method of claim 1, further including the step of controlling addition of the design to the shipping label at a distribution center system.

11. A method for generating an ornamental design on a sheet including a member from a group consisting of a courier shipping label, a greeting card, and a packing list, the member printed at a shipper printer device in connection with a particular shipment, the method including the steps of:

assigning digital electrical signals corresponding to a member of the group for a particular shipment;

transmitting the digital electrical signals corresponding to the member of the group for the particular shipment to a shipper printer device;

combining the digital electrical signals corresponding to the member of the group for the particular shipment with signals corresponding to an ornamental design; and

printing the member of the group, including the ornamental design, for the particular shipment at the shipper printer device.

12. The method of claim 11, wherein the ornamental design includes a heart.

5 13. The method of claim 11, wherein the ornamental design includes a wreath.

14. The method of claim 11, wherein the ornamental design is printed in color.

10 15. The method of claim 11, wherein the ornamental design is a printing of bit map, said bit map not including a logo, shipment, or courier information.

15 16. The method of claim 11, wherein the ornamental design is a first design and said first design includes a second design.

17. The method of claim 11, further including the step of controlling addition of the design at an ordering system computer.

20 18. The method of claim 11, further including the step of controlling addition of the design at an ordering center system computer.

19. The method of claim 11, further including the step of controlling addition of the design at a financial institution system computer.

25 20. The method of claim 11, further including the step of controlling addition of the design at a distribution center system.

21. A method for generating an ornamental design on a sheet including a member from a group consisting of a courier shipping label, a greeting card, and a packing list, the member printed at a shipper printer device in connection with a particular shipment including at least two members of the group, the method including the steps of:

assigning digital electrical signals corresponding to a member of the group for a particular shipment;

transmitting the digital electrical signals corresponding to the member of the group for the particular shipment to a shipper printer device;

combining the digital electrical signals corresponding to the member of the group for the particular shipment with signals corresponding to an ornamental design; and

printing the member of the group, including the ornamental design, for the particular shipment at the shipper printer device.

22. The method of claim 21, wherein said at least two members are printed on the same sheet.

23. The method of claim 21, wherein all said members are printed on the same sheet.

24. The method of claim 20, further including the steps of:
combining ornamental design signals with signals for printing another member of the group; and

printing the member of the group, including the ornamental design, for the particular shipment at the shipper printer device.

representing packing list with the signals representing the customized element;

the step of transmitting includes transmitting the signals representing the customized element, along with the shipping information signals, to the printer device at the distribution center;

5 the step of printing includes printing the customized graphical element, along with the packing list and a shipping label, at the printing device at the distribution center; and

the step of shipping is carried out by shipping the customized graphical element, along with the product, from the distribution center.

10

26. The method of claim 25, wherein the step of printing includes printing the message and the graphical element on a greeting card.

15

27. The method of claim 25, wherein the step of printing is carried out by locating a sheet in the printer, the sheet including a greeting card for the message and having preprinted artwork and demarcations for detaching the greeting card from the packing list and the shipping label; and wherein the step of shipping includes separating the packaging list, the shipping information, and the greeting card by tearing the sheet at the demarcations.
